CS 1337: Computer Science II
Fall 2017
Course syllabus

Class meetings
section 010: MWF 9:00–9:50 in MCS 115

Instructor
Rob LeGrand
e-mail: rlegrand@angelo.edu
webpage: http://www.cs.angelo.edu/~rlegrand/
office phone: 325-486-5422
office location: MCS 205I
office hours: MTWRF 2:00–4:00 and by appointment

Textbook

Description
Problem solving and program development techniques emphasizing modular design. Includes advanced programming topics such as class design, structures, strings, pointers and bit manipulation in C++ using a UNIX environment.

Prerequisites
CS 1336 (Computer Science I) is a prerequisite for this course. Please see me if you haven’t taken it or if you’re unsure about your proficiency in C++ programming.

Grading breakdown
40% assignments
60% exams (probably four, including final)

Student learning outcomes
Students will
• become familiar with the internal storage of integral data.
• learn how to create, compile, link, and run a program in a UNIX operating environment.
• learn how to create multi-file source programs.
• be introduced to bit manipulation, including left and right shift operators and bitwise operators (not, and, or, exclusive or).
• be introduced to pointers.
• learn about character data, including its representation and available functions for testing and manipulating characters.
• be introduced to the string data type and various functions for manipulating strings.
• be introduced to structured data.
• be introduced to object oriented programming using the class concept.

Class format
This class will meet in a computer lab. Unlike in CS 1336, we will be using the GNU C++ compiler in a UNIX environment. In most lab sessions, I will present new material, answer questions, assign new lab assignments and help everyone get started on them. I plan to make as much class time available as possible to work on the lab assignments, but you will still likely need to spend significant time outside of class on most of the assignments.
Discussion and giving and receiving help are generally encouraged when working on assignments, but all work you turn in must be your own; anything you turn in you must be prepared to explain in detail. You must list everyone you helped and/or got help from on each assignment. Failure to do so is considered taking credit for work not done and thus cheating. There will likely be four exams: three midterms and one final; in-class exams must be completed independently.

Attendance is important and expected. You are responsible for the content of each class meeting. You have a duty to inform me as soon as you know that you’ll have to miss a class.

Blackboard (http://blackboard.angelo.edu/) will be used to keep track of grades and assignments.

Final exam

The final exam for this course is scheduled for Wednesday, December 13th, 8:00–10:00.

Academic honesty

Angelo State University expects its students to maintain complete honesty and integrity in their academic pursuits. By remaining enrolled in this course you agree to adhere to the Academic Honor Code, which is contained in both print and web versions of the Student Handbook.

Accommodations

Persons with disabilities which may warrant academic accommodations must contact Student Services in order to request and to implement academic accommodations. For ASU’s policy on absences due to religious holy days, please see OP 10.19 at http://www.angelo.edu/opmanual/.
