Class meetings section 010: MWF 9:00–9:50 in MCS 112  

Instructor Rob LeGrand  
e-mail: rlegrand@angelo.edu  
webpage: www.cs.angelo.edu/~rlegrand/  
office phone: 325-486-5422  
office location: MCS 205I  
office hours: online MTWRF 2:00–4:00 and by appointment  

Description Fundamental concepts and techniques of intelligent systems; representation and interpretation of knowledge on a computer; search strategies and control.  

Prerequisites CS 2336 (Data Structures and Algorithms) is a prerequisite for this course. Please see me if you haven’t taken CS 2336 or if you’re unsure about your proficiency in C++ and data structures.  

Grading breakdown  
50% homework/quizzes/projects/challenges  
30% midterm exams (three or four)  
20% final project  

Student learning outcomes After successful completion of this course, students will demonstrate an understanding of  
• agent-based AI architectures.  
• various searching algorithms commonly used in artificial intelligence software.  
• adversarial search and game-playing agents.  
• logic-based agents.  
• machine learning.  

Class format This face-to-face class will usually have a lecture/discussion format, with homework and programming assignments done primarily outside of class. It is very important that you do all assigned reading before class and come with relevant questions. There may be in-class quizzes over reading and lecture material.
I will take attendance, and you will need to sit in the same place all semester. Class attendance is strongly encouraged. You have a duty to inform me as soon as you know that you’ll have to miss a class meeting.

Assignments may consist of homework problem sets, programming projects and “agent challenges”. In each agent challenge, you will program an agent that will compete against (and perhaps cooperate with) other students’ agents on some task. Each agent challenge may have multiple iterations. You will need an account on the csunix.angelo.edu server to work on all programming assignments.

You will generally be asked to work individually on assignments. Discussion and giving and receiving help are generally encouraged when working on assignments, but all work you turn in must be your own; anything you turn in you must understand thoroughly and be prepared to explain in detail. Whenever you work with anyone but me (including tutors) in any way, you must write fully detailed comments in your code describing the help: who helped, how they helped on which part(s), etc. Failure to do so is considered taking credit for work not done and thus cheating. I will be glad to help you on assignments and concepts when you need it.

Exams must be completed entirely independently. Instead of a comprehensive final exam at the end of the semester, I am planning a final project.

Blackboard (angelo.blackboard.com) will be used to keep track of grades and assignments. You should check Blackboard and your ASU e-mail at least once a day to make sure you’re not missing anything. In particular, your ASU e-mail is the only reliable way I have of contacting you outside of class, so please don’t neglect it.

Safety

I encourage wearing a mask and keeping as much distance from others as is reasonably possible. Keep an eye on ASU’s public health updates at www.angelo.edu/public-health.

For safety reasons, I will hold office hours online using Blackboard Collaborate. Please take advantage of face-to-face class meetings to ask questions and get help, but when you need help outside of class just get in touch and I’ll do what I can to help.

Computer requirements

You may use PCs in the computer labs, but I recommend that you have your own Windows 10 or 11 computer ready to use when you can’t get to a lab. You may need to download and install free software, such as the Respondus LockDown Browser. It is your responsibility to have and to use a reliable Internet connection; for best results, use an Ethernet cable to connect to your Internet source instead of relying on Wi-Fi. You will need a microphone to use Blackboard Collaborate for virtual office hours.
**Semester schedule**

This schedule of topics should be considered approximate and tentative.

<table>
<thead>
<tr>
<th>week of</th>
<th>topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 17th</td>
<td>introduction to artificial intelligence</td>
</tr>
<tr>
<td>January 22nd</td>
<td>intelligent agents</td>
</tr>
<tr>
<td>January 29th</td>
<td>classical search strategies</td>
</tr>
<tr>
<td>February 5th</td>
<td>classical search strategies</td>
</tr>
<tr>
<td>February 12th</td>
<td>beyond classical search</td>
</tr>
<tr>
<td>February 19th</td>
<td>beyond classical search</td>
</tr>
<tr>
<td>February 26th</td>
<td>adversarial search</td>
</tr>
<tr>
<td>March 4th</td>
<td>adversarial search</td>
</tr>
<tr>
<td>March 11th</td>
<td><em>spring break</em></td>
</tr>
<tr>
<td>March 18th</td>

**Final exam/project**

The final exam for this course is scheduled for Wednesday, May 8th, 8:00–10:00. The plan is not to have a final exam, but we may use this time for some other purpose relating to the final project.

**Academic honesty**

Angelo State University expects its students to maintain complete honesty and integrity in their academic pursuits. By remaining enrolled in this course you agree not to commit academic misconduct as defined in section I.B.1 of the Student Handbook, available at [www.angelo.edu/student-handbook](http://www.angelo.edu/student-handbook).

**Important university policies**

- You must contact Student Disability Services in order to request and to implement academic accommodations.
- For ASU’s policy on absences due to religious holy days, see OP 10.19 at [www.angelo.edu/opmanual](http://www.angelo.edu/opmanual).
- I am obligated to report any knowledge of sexual misconduct to the Title IX office; see [www.angelo.edu/services/title-ix](http://www.angelo.edu/services/title-ix) for more.

**Modifications**

This syllabus, including grade evaluation and course schedule, is subject to modification. In particular, the COVID-19 pandemic may require significant changes in course delivery and content on potentially short notice.
